

## Robust for demanding workplace environments

The Premier High Flow is a practical floor standing solution for the office or more demanding factory, warehouse and educational environments.

The simple touch button operation dispenses chilled or room temperature water and the protective shroud around the dispense head make it a hygienic solution for staff that like to fill bottles. Combined with optional features, it can be provided to meet your exact requirements.

The High Flow is endorsed by the Health Education Trust's Real Choice scheme and supports best practice solutions for healthier schools. For more information visit [www.healthedtrust.com](http://www.healthedtrust.com).
